

Finding Challenge for Your Advanced Learner

Wednesday,

April 18

7:00-9:00 PM

Havens
Elementary
School Library
Piedmont, CA

\$10 Suggested
FREE to ALPS
members

**ADVANCED LEARNERS
PROGRAM SUPPORT**

- Does your student need access to more challenging books?
- Would your child like working with a peer on different math problems than others in the classroom?
- Would your student enjoy doing in-depth science or other projects with teacher support?
- Could your child skip a year in one subject or altogether?
- Does your student need more differentiation?

Does any of this sound like it could benefit your child? Come talk with other parents, find out what is possible, and how to make it happen.

Please join the Piedmont Advanced Learner Program Support ([ALPS](#)) group for a discussion of getting the most for your student. Dr. Lisa White, Ph.D., will facilitate and lead the conversation. She is a psychologist and Piedmont parent whose work includes conducting academic achievement, intelligence, and neuropsychological assessments of students. These assessments (offered privately through the [Summit Center](#)) can result in recommendations of adjustments that should be made in the school and the classroom, to enable students to reach their potential. Dr. White will share with you the kinds of recommendations she makes and facilitate a wider discussion about student needs and possible solutions.
